About Company

Resources of Africa Investment is a South African company providing reliable transport, logistics, mining and heavy equipment solutions to support the demanding requirements of the mining, construction and industrial sectors. We are committed to delivering dependable equipment, professional transportation services and practical solutions that contribute to safe, efficient and productive operations.

Our capabilities include lowbed transportation of heavy machinery up to 80 tons, 34-ton side tipper trucks, tipper trucks, heavy equipment, crushing and screening solutions. We understand that mining and construction operations depend on the timely movement of materials, machinery and equipment, which is why we focus on reliability, operational efficiency and professional service.

With our strategic location in Steelpoort, Limpopo, we are positioned to serve mining and industrial operations within the region and across South Africa. Our approach is built around understanding each client's operational requirements and providing equipment and logistics solutions that support their production objectives.

Vision & Mission

Vision

Our vision is to become a trusted and recognised provider of mining, transport, logistics and heavy equipment solutions in South Africa and across the African continent.

We aim to build a company known for dependable service, operational excellence and long-term partnerships with mining companies, contractors, construction companies and industrial organisations. Through continuous improvement, responsible business practices and investment in equipment and people, we seek to contribute to the growth and efficiency of the industries we serve.

Mission

Our mission is to provide safe, reliable and efficient transport, logistics and heavy equipment solutions that enable our clients to keep their operations moving.

We are committed to understanding the unique requirements of every project and delivering practical solutions that meet operational, safety and time requirements. We strive to maintain high standards across our equipment, personnel and service delivery while building professional relationships based on reliability, transparency and accountability.

Our Values

Reliability

Our clients depend on us to move heavy equipment, materials and resources when they are needed. We focus on dependable service delivery and operational consistency.

Safety

Safety is fundamental to our operations. We promote responsible operating practices and take appropriate measures to protect our employees, clients, equipment and the environments in which we operate.

Professionalism

We conduct our business with professionalism and respect. From initial engagement to project completion, we aim to provide clear communication and dependable service.

Integrity

We believe in conducting business honestly and transparently. Our relationships with clients, employees, suppliers and business partners are built on trust and accountability.

Efficiency

Mining and construction operations require effective utilisation of time and resources. We focus on efficient logistics and equipment solutions designed around our clients' operational requirements.

Commitment

We are committed to delivering on our responsibilities and supporting our clients throughout their projects. We continuously seek ways to improve our service and capabilities.

OUR COMMITMENT

At Resources of Africa Investment, we understand that our clients operate in industries where time, safety, reliability and efficiency matter. Our commitment is to provide practical transport, logistics and equipment solutions that support the successful execution of our clients' projects.

We continuously seek to strengthen our capabilities, improve our service delivery and build relationships with organisations that share our commitment to professional and responsible operations.

Resources of Africa Investment
Powering Mining Through Reliable Logistics & Heavy Equipment.

TRANSPORT & LOGISTICS

Lowbed Transportation - Up to 80 Tons

Our lowbed transportation service is designed for the movement of heavy machinery and specialised equipment that cannot be transported using conventional trucks. With capability for loads of up to 80 tons, our lowbed solutions are suitable for moving heavy equipment used in mining, construction and industrial operations.

We support the transportation of equipment between operational sites, project locations, workshops and other designated destinations. Each movement requires careful consideration of the equipment dimensions, weight, route and loading requirements, and we focus on coordinating transportation according to the specific requirements of the project.

TRANSPORT & LOGISTICS

34-Ton Side Tipper Trucks

Our 34-ton side tipper trucks provide efficient bulk material transportation for mining, construction and related operations. Side tippers are particularly suited to projects requiring the transportation and controlled offloading of large volumes of material.

Our service can support the movement of materials between mines, processing facilities, construction sites, stockpiles and other operational locations. We focus on dependable availability, efficient transportation and responsible handling throughout the delivery process.

TRANSPORT & LOGISTICS

Tipper Trucks

Resources of Africa Investment provides tipper truck solutions for projects requiring the transportation of bulk materials. Our tipper truck services can support mining, construction, earthmoving, infrastructure and other applications where material needs to be transported and efficiently discharged.

We work with clients to understand their project requirements and provide suitable transportation solutions based on the nature of the material, distance, volume and operational schedule. Our objective is to help clients maintain efficient material movement while supporting their broader project operations.

MINING &
CONTRACTOR SOLUTIONS

Heavy Equipment

Resources of Africa Investment provides access to heavy equipment solutions supporting mining, construction, earthmoving and industrial operations. Heavy machinery plays an important role in excavation, material handling, site preparation, loading and other demanding operational activities.

We aim to support contractors and mining operations with practical equipment solutions aligned with project requirements. By combining equipment capabilities with our transport and logistics services, we can provide an integrated approach to heavy equipment movement and operational support.

MINING &
CONTRACTOR SOLUTIONS

Crushing & Screening

Our crushing and screening capabilities support the processing, sizing and preparation of materials for mining, construction and aggregate applications. Crushing and screening are essential processes for operations that require materials to be reduced, separated and prepared according to specific project or production requirements.

We support clients requiring material processing solutions as part of their mining and contracting activities. Our objective is to contribute to efficient material handling and processing while providing solutions that can be integrated into broader mining, quarrying, construction and infrastructure operations.
